

BIO: TED BRUNELL

Ted Brunell is a Red Hat Certified Architect who works as the Chief Architect for the DoD team with a focus on the RHEL Platform and cloud computing. Ted also spent 20 years in the United States Marine Corps, 13 of which was in the Data Communications field. Prior to coming to Red Hat, Ted worked as a System Engineer at Booz Allen Hamilton. His main focus there was the integration of Open Source products to satisfy customer requirements.

The Lunch and Learn will cover IT security trends as people move towards a public or hybrid cloud based IT infrastructure. AWS, Microsoft Azure, Google Cloud and other platforms are defining the future of Enterprise and DoD IT. We will discuss how to build scale-out cloud architectures with security integrated into the solution instead of being an afterthought. We will drill down into architecture considerations that strengthen governance and security. We will also discuss use cases how cloud computing provides agility and collaborative DevOps environments to meet DoD requirements.

Ted Brunell - RHCA, RHCE, RHCVA

Principal Solution Architect

Chief Architect, DoD
